VEDURE *Bust Therapy*

FEATURES This bust therapy treatment uses the latest micro-current technology to tone, lift and stimulate chest muscles. A nutrient-rich cream is first massaged onto the breasts before therapy begins, optimising breast enhancement results. Micro-currents then work in synchrony with the body's own bio-electrical field, relaxing the bosom and stimulating blood circulation for firmer and more natural looking busts. Combined with an enhancing massage, Vedure's bust therapy tightens your breast tissue, giving you the confidence to walk tall, chest forward.

BAZAAR LOVES IT Say hello to tight body-con dresses and cleavage-friendly tops with a new bust that accentuates those womanly curves. We love how this therapy treatment gives you a chest that uplifts

the overall body structure, making you look more toned from top to toe. The cream used in Vedure's bust therapy also makes skin feel luxurious and soft. That definitely puts this treatment on BAZAAR's It list.

GOOD TO KNOW Phyto-hormones, which are hormones from plants, are used as a key ingredient in the nutrient-rich creams that Vedure lavishes on your bust during this therapy. Even in small amounts, these natural hormones help to promote cell growth in the chest area, giving you sizeable, healthy-looking breasts.

\$250 for 60 minutes. Available at Vedure, #04-06/B Wheelock Place, Tel: 6732 6448; #B2-09 Marina Bay Sands Robinsons, Tel: 6688 7402. Visit www.vedure.com
